

# Shahzeb Mahmood

DevOps Engineer | DevSecOps Engineer

(+1)6475693162 | [shahzebmahmood3@gmail.com](mailto:shahzebmahmood3@gmail.com) | [Portfolio](#) | [LinkedIn](#) | [HacktheBox](#)

## Summary

---

DevOps/DevSecOps engineer with experience in cloud platforms, CI/CD pipelines, and infrastructure automation. Skilled in scripting, container orchestration, system administration, and security-focused operations. Have delivered scalable and secure deployments while optimising system performance in fast-paced environments. Passionate about building reliable infrastructure, improving operational workflows, and integrating security into every stage of the software lifecycle. Enthusiastic about open-source contributions, continuous learning, and leveraging technology to solve challenging problems efficiently.

## Work Experience

---

### DevOps Engineer | Seqera Labs – Toronto | 05/2025 – Present

- Built and maintained secure CI/CD pipelines with integrated Trivy vulnerability scanning, reducing container and IaC deployment risks by 35%.
- Automated secrets management with External Secrets Operator (ESO) and Terraform, eliminating manual handling and exposure risk for 100+ secrets.
- Implemented Terraform-based infrastructure as code with embedded security baselines, improving compliance and reducing misconfigurations by 40%.
- Strengthened cloud (AWS, Azure, GCP) and Kubernetes security via least-privilege IAM roles, network segmentation, and automated patching, reducing vulnerabilities by 30%.
- Leveraged Google SecOps, Stackdriver, and Cloud Logging for real-time monitoring, threat detection, and incident response, decreasing average incident resolution time from 6 hours to 1.5 hours.
- Partnered with development and security teams to enforce shift-left security practices, identifying and remediating 90% of vulnerabilities pre-production.
- Containerised applications using Docker, deployed and orchestrated with Kubernetes, achieving 99.9% uptime.

### Cloud Support Engineer | Seqera Labs – Toronto | 06/2023 – 05/2025

- Provided cloud support across AWS, Azure, and GCP, resolving 95% of issues within 24 hours.
- Collaborated with cross-functional teams to improve system reliability, achieving 99.9% uptime.
- Developed automated scripts with Python and Bash, reducing average ticket resolution time by 40%.
- Ensured compliance with security protocols (IAM, KMS, VPNs) for 100+ clients, safeguarding sensitive data.

### IT Administrator | Cloudbeds – Toronto | 04/2022 – 06/2023

- Managed IT budgets and forecasting for hardware, software, and consulting, optimising spend by 25%.
- Collected and analysed client feedback to refine IT policies, resulting in a 30% improvement in support efficiency.
- Designed remote service manuals and triage procedures, improving first-contact resolution by 20%.
- Designed and implemented tools and software that improved operational efficiency by 50%.
- Supported internal users with their issues and requests.

- Managed cloud platforms, building and scaling infrastructure

### **Infrastructure Technology Helpdesk Administrator** | TractionOnDemand – Toronto | 12/2019 – 03/2022

- Managed identity and access via Okta, automating onboarding/offboarding for 500+ employees.
- Delivered IT security operations using Sophos, CrowdStrike, Firewalls, and incident response protocols, reducing security incidents by 25%.
- Provided 1st–3rd line support for Microsoft Azure, GCP, G Suite, Salesforce, and office infrastructure.
- Automated workflows and scripting (Python, Bash, PowerShell) for SaaS operations, improving productivity by 30%.

### **Application Support Analyst** | Impellam Group – Luton, UK | 07/2019 – 12/2019

- Maintained SQL Server databases and performed advanced troubleshooting for bespoke applications.
- Monitored applications using New Relic, deploying bug fixes and configuration changes, and improving uptime by 15%.

### **Service Desk Analyst** | Impellam Group – Luton, UK | 01/2018 – 07/2019

- Delivered 1st–2nd line support, managing MS Exchange, O365, Azure AD, and on-prem AD.
- Automated daily tasks using IRIS and Zendesk, reducing manual workload by 20%.
- Monitored infrastructure with SolarWinds and developed documentation for processes used by 50+ staff.

### **Education**

---

- MSc: Computer Science with Cybersecurity, 08/2025 (Expected to finish 2026)
- BSc (Hons): Sport and Exercise Science, 07/2017

### **Certifications**

---

- Certified in Cybersecurity (CC) – ISC2 Dec 2024 – Dec 2027
- IT Support Professional Certificate – Google
- Professional Workspace Administrator – Google
- AWS Certified Cloud Practitioner – AWS Dec 2023 – Dec 2026
- TCM Practical Junior Penetration Tester

### **Projects**

---

#### **Terraform EKS HelloWorld** – [GitHub](#)

- Deployed a fully functional AWS EKS cluster using Terraform.
- Containerised a “Hello World” app with Docker and orchestrated it with Kubernetes.
- Demonstrates Infrastructure as Code, cloud automation, and scalable deployments.

#### **Personal Portfolio Website** – [GitHub](#)

- Built a React + Tailwind CSS portfolio website to showcase projects and professional experience.
- Implemented responsive design, smooth navigation, and GitHub Pages hosting.
- Highlights frontend development, web design, and deployment skills.
